

Micro-Touch® Nitrile E.P.®

Micro-Touch® Nitrile E.P.® examination gloves have an extended cuff that provides extra protection over the wrist and arm for healthcare professionals in high-risk clinical settings. The extra protection is needed when dealing with chemotherapy agents, bodily fluids, and blood-borne pathogens. It provides excellent chemical and puncture resistance and is textured for better grip in wet and dry procedures.

Safety & Protection

Infection Control

Allergy Concerns. This examination glove is made of 100% nitrile. It does not contain natural rubber latex, thus addressing Type I (latex sensitive) allergy concerns.

Sterilization. This is a non-sterile examination glove.

Quality Benchmarks. Meets or exceeds ASTM examination glove standards. Manufactured within the quality guidelines of ISO 13485:2003, ISO 9001:2001, and FDA-QSR. FDA approved for handling chemotherapy drugs.¹

Cuff. Extended 12" beaded cuff offers increased protection.

Resistance. Nitrile film has excellent puncture and chemical resistance. Nitrile gloves are recommended for conditions where high strength and chemical protection are required.

This glove is tested for use with the following 5 chemotherapy drugs: Vincristine, Carmustine, Cyclophosphamide, Doxorubicin HCl, and Cisplatin.

Skin Protection

Powder-Free. To help eliminate powder-related complications and sensitivity.

Comfort & Fit

Hand Fatigue

Stretchability (Modulus). Nitrile has high elasticity, providing wearers with good comfort and fit.

Shape of Glove/Former. Ambidextrous.

Tactile Sensitivity

Dependability. The fully textured finish of the glove provides superior tactile sensitivity in a synthetic glove.

Memory. Nitrile has high elasticity and good memory, allowing the film to adapt to the wearer's hand.

Grip

Application Driven. The fully textured finish of the glove provides extra protection for wet or dry grip and against slippage.
