

SAFESKIN* SYNTHETIC

Powder-Free Vinyl Exam Gloves

In any health care setting, protection from exposure to micro-organisms is of critical importance – for you and for the patients under your care. Gloves provide the primary shield required to prevent contact with infectious substances, including blood-borne pathogens, and reduce the risk of cross-contamination.

From proprietary latex and nitrile formulations for moderate to high risk procedures involving infectious fluids or blood-borne pathogens, to vinyl for low risk situations, Kimberly-Clark SAFESKIN* has a glove solution for you. Our complete line includes gloves for primary care services, dental procedures, diagnostic tests, surgical procedures and general use applications.*

SAFESKIN* SYNTHETIC

The SAFESKIN* SYNTHETIC is a powder-free and latex-free vinyl exam glove suitable for low risk applications not involving body fluid contacts and hazardous chemicals.

Functional Benefits

- Ambidextrous for use across a variety of glove applications.

Clinical Specifications

- Natural Rubber Latex-free – primary material polyvinyl chloride, reducing the potential for Type I glove-associated allergic reactions to natural rubber latex proteins.
- Powder-free (according to ASTM D 6124), minimising the potential for powder-related complications, such as irritant contact dermatitis.

Quality Standards

- Meets or exceeds AQL 1,5 in accordance with European Norm EN 455-1.
- CE-marked as Medical Device Class I (93/42/EEC).

Mission Statement

From protective apparel to medical devices – everything we make, everything we do, is focused on protecting health care professionals and patients. This means we work every day to develop and deliver quality products and to provide responsive customer service that you can depend on to meet your protection needs.
