ALOETOUCH ICE™

We know that your hands are the tools that allow you to make miracles happen every day. Unfortunately, frequent handwashing and glove donning can damage your skin and lead to discomfort. To help make your life easier, Medline has devised a product that makes caring for your hands a no-brainer.

With Aloetouch Ice, we have added aloe to the inside of our thin nitrile exam glove. The aloe works to moisturize and soothe your hands while you go about your everyday tasks. Now you can rest assured that your hands are receiving optimal protection and care; allowing you to devote your full attention to your job!

Healthy hands start with Aloetouch exam gloves
