Sempermed is a vertically integrated manufacturer that provides focused sales, marketing, and logistical support to those in need of hand protection.

SemperCare® Nitrile is manufactured as a copolymer glove to provide a better fit and feel. This non-latex alternative is made stronger through a manufacturing process called “fusion bonding” – similar to our Polymed® glove. “Fusion bonding” integrates synthetic polymers into the material to create a multi-layered glove for enhanced protection.

## FEATURES

- “Fusion bonding”
- Better elasticity
- Powder-Free
- Tested for protection against chemotherapy drugs
- Manufactured without natural rubber

## BENEFITS

- Strong and more durable
- Less pressure on fingers for an improved fit with more comfort
- Eliminates aerosolization of glove powder
- Appropriate for handling cytotoxic chemicals
- Eliminates exposure to latex
